KEY RISKS	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to “Risk Factors” in the Singapore Prospectus and “Investment and risk Considerations” in the Luxembourg Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> <li>▪ <b>Market risks in the United States.</b> Your investments may go up or down due to changing economic, political or market conditions that impact the share price of the companies that the Fund invests in.</li> <li>▪ <b>Currency.</b> Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall.</li> <li>▪ <b>You have greater exposure to market risks as this is an equity fund.</b> Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.</li> </ul>	
Liquidity Risks	
<ul style="list-style-type: none"> <li>▪ <b>The Fund is not listed and you can redeem only on Dealing Days.</b> There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager.</li> <li>▪ <b>Flexibility in redemption may be restricted.</b> The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances.</li> </ul>	

<ul style="list-style-type: none"> <li>▪ <b>Difficulty in realising the value of investments readily may delay payment of redemption proceeds.</b> Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.</li> </ul>													
Product-Specific Risks													
<ul style="list-style-type: none"> <li>▪ <b>Sustainability approaches risks.</b> The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors. The Investment Manager may not apply the sustainable investment criteria correctly which may lead to the Fund foregoing investment opportunities or investing in securities which do not meet the sustainability criteria.</li> <li>▪ <b>Smaller companies.</b> Shares of small and mid-size companies can be more volatile than shares of larger companies. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to value or to sell a share at a desired time and price, increasing the risk of investment losses.</li> <li>▪ <b>Derivatives.</b> The Fund may use derivatives to reduce risk or manage the portfolio more efficiently. However this introduces other risks, such as, a derivative counterparty may not meet its contractual obligations.</li> <li>▪ <b>Currency hedging.</b> While seeking to hedge exchange rate movements of a currency relative to the Fund's base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.</li> <li>▪ <b>Concentration.</b> Investing in a limited number of issuers, industries, type of securities or within a limited geographical can be riskier than investing more broadly making it more susceptible to any single economic market, political or regulatory occurrence. The Fund's value may fall where the area of concentration is heavily affected by an adverse event.</li> <li>▪ <b>Sustainability risks.</b> A sustainability risk means an environmental, social or governance (ESG) event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of the investment. In managing the Sub-Fund, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Sub-Fund.</li> </ul>
