CCC & Below	11.30
Not Rated	0.66

Bond credit quality ratings provided by Janus Henderson Investors is based on the average of ratings from Moody's, Standard & Poor's and Fitch where all three agencies have provided a rating. If only two agencies rate a security, the average is on those. If only one agency rates a security, that rating is used. Ratings are measured on a scale that ranges from AAA (highest) to CCC (lowest). Swaps, Options, Cash and Bond Futures are separately grouped.

Fees & charges (%)

Annual management charge (AMC)	0.38
Ongoing charge (OCF)	0.85

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. The performance data does not take account of the initial charge and Janus Henderson does not currently levy a redemption charge. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund invests at least 70% of its assets in bonds, including high yield (non-investment grade) bonds in emerging markets and other debt securities denominated in hard currencies (e.g. USD, EUR, GBP). The Fund may invest up to 30% in emerging market corporate bonds; 10% in distressed debt, 10% in contingent convertible bonds (CoCos), 10% in asset-backed and mortgage-backed securities and 10% in unrated securities. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements, although it may also be exposed through investments or cash to other currencies. The Fund may invest in other assets including bonds of other types (including perpetual bonds), cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) including interest rate futures, bond futures, options, swaps (including total return swaps (up to 20%), interest rate swaps, credit default swaps) and forwards, with the aim of making investment gains or to manage the Fund more efficiently. The Fund is actively managed with reference to the JP Morgan EMBI Global Diversified Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, however the geographical scope of the Fund may have the effect of limiting the extent to which the Fund will deviate from the index.

Investment strategy

The Investment manager generates investment ideas through a proprietary assessment of sovereign credit risk which includes both quantitative and qualitative components. Country over/under-weights are identified by comparing the team's assessment of the level and trend of sovereign credit risk with the current market valuation (credit spread) of that country. Within a country, the security selection process seeks to identify superior risk-adjusted opportunities within the broad universe, including off benchmark securities.

Fund specific risks

When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall. High yielding (non-investment grade) bonds are more speculative and more sensitive to adverse changes in market conditions. The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares/units of the issuer or to be partly or wholly written off. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted. Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures. The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Glossary

Distribution Yield
The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market share price of the fund at the date shown.

Duration
How far a fixed income security or portfolio is sensitive to a change in interest rates, measured in terms of the weighted average of all the security/portfolio's remaining cash flows (both coupons and principal). It is expressed as a number of years. The larger the figure, the more sensitive it is to a movement in interest rates. 'Going short duration' refers to reducing the average duration of a portfolio. Alternatively, 'going long duration' refers to extending a portfolio's average duration.

Underlying Yield
The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund at the date shown.

Weighted Average Life (WAL)
The average time taken (in years) for the principal to be repaid for securitised assets, or the probable time to maturity for non-securitised assets. Securitised assets, also known as 'asset backed' securities, represent a pool of other interest bearing assets such as loans and mortgages. The value is based on the cash flows of the underlying assets.

Yield to worst
If a bond has special features, such as a call (ie, the issuer can call the bond back at a date specified in advance), the yield to worst is the lowest yield the bond can achieve provided the issuer does not default.

Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication and is intended as a summary only and potential investors must refer to the prospectus of the UCITS and to the KID before investing. Information is provided on the Fund on the strict understanding that it is to - or

for clients resident outside the USA. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor. Nothing in this communication is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units. Deductions for charges and expenses are not made uniformly throughout the life of the investment but may be loaded disproportionately at subscription. If you withdraw from an investment up to 90 calendar days after subscribing you may be charged a Trading Fee as set out in the Fund's prospectus. This may impact the amount of money which you will receive and you may not get back the amount invested. The value of an investment and the income from it can fall as well as rise significantly. Some Sub-Funds of the Fund can be subject to increased volatility due to the composition of their respective portfolios. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. The Fund is a recognised collective investment scheme for the purpose of promotion into the United Kingdom. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Fund and that compensation will not be available under the United Kingdom Financial Services Compensation Scheme. The Fund is a foreign collective investment scheme registered in the Netherlands with the Authority for the Financial Markets and in Spain with the CNMV with the number 353. A list of distributors is available at www.cnmv.es. For sustainability related aspects please access Janushenderson.com. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. With effect from 1 January 2023, the Key Investor Information document (KIID) changed to the Key Information Document (KID), except in the UK where investors should continue to refer to the KIID.
