What is this product?

Type

Janus Henderson Horizon Total Return Bond Fund is a sub-fund of Janus Henderson Horizon Fund, an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg. Janus Henderson Horizon Fund qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This investment has no maturity date. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

Objectives

The Fund aims to provide income and capital growth, exceeding that of cash, over a rolling 3-year period. Performance target: To outperform the Euro Short-Term Rate by at least 2.5% per annum, before the deduction of charges, over any 5 year period. The Fund invests in bonds of any quality, including high yield (non-investment grade) bonds and distressed debt, of governments, companies or any other type of issuer in any country. The Fund may invest up to 30% of its assets in asset-backed and mortgage-backed securities (ABS/MBS), including up to 10% of which may be high yield (non-investment grade, equivalent to BB+ rated or lower). The Fund may invest up to 20% of its assets in China onshore bonds traded through Bond Connect. The Fund may invest up to 50% of its net assets in total return swaps. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements. The Fund may also invest in other assets including contingent convertible bonds (CoCos), perpetual bonds, cash and money market instruments. The Fund makes extensive use of derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the Euro Short-Term Rate, as this forms the basis of the Fund's performance target. For currency hedged Share Classes, the rate that corresponds with the relevant Share Class currency is used as the basis of the performance comparison. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark. The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the prospectus. The Fund promotes environmental and/or social characteristics as defined under Article 8 of the Sustainable Finance Disclosure Regulation (SFDR). This share class accumulates income which is retained within the price of the share class. You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Fund's Prospectus. The Fund's Depositary is BNP Paribas, Luxembourg Branch.

Intended Retail Investor

Investors who want a higher-risk alternative to a money market fund, understand the Fund's risks and complex investment approach, and intend to invest their money for at least five years. This Fund is designed to be used only as a component in a diversified investment portfolio and is not designed for investors who are unable to accept more than a minimal loss of their investment.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk 1 **2** 3 4 5 6 7 Higher Risk

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at www.janushenderson.com

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years

Example Investment: EUR 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	8,430 EUR	8,110 EUR
	Average return each year	-15.67%	-4.10%
Unfavourable	**What you might get back after costs**	8,640 EUR	8,990 EUR
	Average return each year	-13.58%	-2.11%
Moderate	**What you might get back after costs**	10,070 EUR	10,480 EUR
	Average return each year	0.66%	0.95%
Favourable	**What you might get back after costs**	10,770 EUR	11,420 EUR
	Average return each year	7.68%	2.69%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between December 2020 and December 2023.

The moderate scenario occurred for an investment in the benchmark between April 2015 and April 2020.

The favourable scenario occurred for an investment in the benchmark between January 2016 and January 2021.

What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, BNP Paribas, Luxembourg Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	89 EUR	473 EUR
Annual cost impact (*)	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.8% before costs and 0.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
