A consumer (or class of consumer) might intend to hold a particular investment product as part of a diversified portfolio. ### **Product description and key attributes**

The key product attributes of the Australian Fixed Interest Fund are:

- The Australian Fixed Interest Fund seeks to achieve a total return after fees that exceeds the total return of the Benchmark (Bloomberg AusBond Composite 0+ Yr Index), over rolling three-year periods;
- The Manager seeks to add value to the benchmark by using a combination of active strategies including duration and yield curve management (actively managing the maturity profile of securities within the fund), sector allocation and security selection;
- Income distributions may be paid on a quarterly basis. This depends on the fund's circumstances and there may be periods where no distributions are paid;
- A management fee of 0.45% per annum of the asset value of the fund is charged. A buy/sell spread may be charged when entering/exiting the fund; and
- Online access to investment details via Portfolio Online.
