Who we are

At Janus Henderson our mission is to help clients define and achieve superior financial outcomes through differentiated insights, disciplined investments, and world-class service. This means being ever mindful of the futures of the millions of lives that our thinking and our investments help shape. Our diverse client base and robust balance sheet allow us to offer financial strength and stability with which to help investors achieve their objectives.

The human connection matters in all that we do. Teams across Janus Henderson come together every day to deliver outcomes for our clients – and their clients – that make a difference. We are proud of this responsibility as we fulfil our purpose of 'Investing in a brighter future together'. The goals we set, the strategy we create, and the way that we work are all shaped with this ultimate objective in mind.

Why us

Choosing Janus Henderson means benefiting from:

Differentiated insights

- We are proud of our deep-rooted research culture, which has underpinned our 89-year track record of investing.
- Janus Henderson's investment teams meet thousands of companies each year. Insight from these meetings combined with proprietary analysis results in original views that shape our investment positioning.
- With 340 investment professionals around the world, we benefit from a range of perspectives that we test and share as we seek to differentiate between the winners and losers on behalf of our clients.

Disciplined investments

- Our investment teams set clearly defined objectives and processes to deliver long-term risk-adjusted returns. We value the trust clients place in us and are disciplined in staying true to our investment style through all market conditions.
- We apply robust controls to ensure that risk taken is in accordance with client expectations and investment manager expectations. We have more than 150 experts in our risk and compliance teams.

World class service

- We offer global reach with our broad network of investment and client service specialists. This is combined with the responsiveness, tailored solutions, and personal touch of a local partner.
- Understanding the challenges our clients – and their clients – face globally, and working in partnership, means we can provide support as we blend our best ideas and capabilities to define appropriate tailored outcomes.
- We seek to contribute to clients' understanding and decision-making – we share knowledge through published insights, at events, and by actively participating in debate on the future of investing.

Authorised Corporate Director's (ACD) report for the six months ended 31 January 2024

We are pleased to present the Interim Report & Accounts for Janus Henderson Investment Funds Series II (the 'Company') for the six months ended 31 January 2024.

Authorised status

The Company is an open-ended investment company (OEIC) with variable capital incorporated in England and Wales under registered number IC000189 and authorised by the Financial Conduct Authority (FCA) with effect from 30 August 2002. It is a United Kingdom Undertakings for Collective Investment in Transferable Securities (UK UCITS) scheme structured as an umbrella company, comprising of one sub-fund ('fund'), complying with chapter 5 of the Collective Investment Schemes Sourcebook (COLL). The operation of the Company is governed by the OEIC Regulations, COLL, its Instrument of Incorporation and Prospectus.

The Company has an unlimited duration. Shareholders are not liable for the debts of the Company.

Segregation of assets

This umbrella consists of one sub-fund, however should more funds be launched in the future then each fund would be treated as a separate entity and would be a segregated portfolio of assets and those assets could only be used to meet the liabilities of, or claims against that fund.

Statement of Authorised Corporate Director's (ACD) responsibilities

The FCA's COLL requires the ACD to prepare financial statements for each annual accounting year and interim accounting period, which give a true and fair view, in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Management Association (IMA) in May 2014 and amended in June 2017, UK Generally Accepted Accounting Practice (UK GAAP) (UK Accounting Standards, comprising the Financial Reporting Standard 102 (FRS 102) applicable in the UK and Republic of Ireland), of the financial affairs of the Company and their revenue/expenditure for the period. The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, Prospectus and the OEIC Regulations. The ACD is also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Value assessment

The board of Janus Henderson Fund Management UK Limited (JHFMUKL) present the value assessment report for the period to 31 December 2022, made available on our website www.janushenderson.com.

Access by this link (<https://www.janushenderson.com/en-gb/investor/notice/value-assessment-report>).

The FCA, the UK's financial services regulator, requires all fund management groups to perform a detailed assessment of whether funds are providing value to investors, and publish an annual statement summarising the outcome of this process, known as the value assessment. Our report is published by JHFMUKL, the Board of the ACD (the body responsible for an investment fund) and summarises the period to 31 December 2022. For the period to 31 December 2023, the report is expected to be published on our website at the end of April 2024.

The value assessment considers a minimum of seven criteria set by the FCA. While investment performance and quality of service are clearly important factors, costs and charges paid by investors are also key considerations. At Janus Henderson, ensuring value is delivered to investors has always been central to our process and therefore the value assessment is an extension to the existing ongoing monitoring processes that provide oversight of how the funds are managed.

The report contains an overview of the process that Janus Henderson undertook to perform this assessment along with the conclusions.

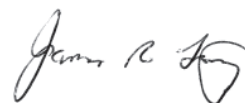

Macro risks

The Investment Manager continues to monitor closely macro risks, including geopolitical risks, such as the ongoing impact of the Russia/Ukraine conflict and the conflict in the Middle East, market risks, such as stresses in the banking sector and the higher inflationary and interest rate environment. We have established processes to be able to respond timely to changes. We have well-established and tested business continuity and crisis management processes in place, which cover a large number of disruptive scenarios, including cyber threats and market events. The Investment Manager also has embedded market risk monitoring processes, including modelling potential stressed market scenarios, to help inform our investment decisions.

Authorised Corporate Director's (ACD) report (continued)

Director's statement

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority. I hereby certify the investment review and financial statements on behalf of the Directors of Janus Henderson Fund Management UK Limited.

Accounting policies

Basis of preparation

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the SORP for UK Authorised Funds issued by the IMA in May 2014 and amended in June 2017, FRS 102, the FCA's COLL and the Company's Instrument of Incorporation and Prospectus. The financial statements have been prepared on a going concern basis.

The accounting policies, distribution policy and potential risks are consistent with those of the financial statements for the year ended 31 July 2023 and are described in those annual accounts.

Janus Henderson Cautious Managed Fund

Authorised Corporate Director's report

Investment Fund Managers

Stephen Payne and James Briggs

Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index by 1.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests in shares (also known as equities) and bonds of governments, companies or any other type of issuer, in any country. At all times the investment in equities will be limited to a maximum of 60% of the value of the fund's portfolio and the fund will normally have a strong bias towards UK companies and bonds. Companies and bond issuers may be of any size, in any industry.

The fund may also invest in other assets including Collective Investment Schemes (CIS) (including those managed by Janus Henderson) cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has a high degree of freedom to choose individual investments for the fund.

Strategy

The Investment Manager looks to balance the long-term growth and income potential of equities with the more stable returns offered by bonds and cash. The strategy has the flexibility to adjust to changing market conditions by altering the level of exposure to the different asset classes. The Investment Manager will typically follow a value investment style for the equity portion of the portfolio, seeking companies it believes to be undervalued by the market that may be more resilient in periods of economic uncertainty.

Performance summary

Cumulative performance

Performance summary (continued)

* From 1 July 2020, the fund benchmark changed from 50% FTSE All Share + 50% ICE Bank of America ML 5-15 Year Sterling Non Gilt Index to 50% FTE All Share + 50% ICE Bank of America Sterling Non Gilt Index. Past performance before 1 July 2020 is shown for the previous fund benchmark.

** Performance is a blend of the old and new benchmark.

Source: Morningstar

Class I accumulation (Net), NAV to NAV, net of fees and net income reinvested as at 12 noon valuation point.

Class I accumulation (Gross), NAV to NAV, gross of OCF and net income reinvested as at 12 noon valuation point.

Benchmark values are as at close of business.

Class I accumulation is disclosed as it is the representative share class.

Benchmark usage:

Index: 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index

Index usage: Target

Index description: The 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index is a composite index reflecting 50% exposure to shares listed on the London Stock Exchange and 50% exposure to sterling denominated corporate bonds. It is the basis of the fund's performance target.

Peer group: IA Mixed Investment 20-60% Shares Sector

Peer group usage: Comparator

Peer group description: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims. Investors should note that many funds in the sector peer group have a more global focus than the fund.

Past performance does not predict future returns. The value of an investment and the revenue from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

Investment review

The fund returned 4.8% (Net), 5.2% (Gross) based on Class I accumulation over the period under review, compared with a return of 3.8% in the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index, a return of 4.6% in the Target Index + 1.5% and a return of 3.7% in the IA Mixed Investment 20-60% Shares Sector peer group benchmark.

Global equities delivered strong, albeit volatile, performance during the reporting period. Investor concerns about the direction of interest rates buffeted sentiment across asset classes. Slowing inflation in core economies, combined with dovish rhetoric from the US Federal Reserve (Fed), fuelled hopes that global interest rates may have reached their peak. More recently, however, investors scaled back their hopes of imminent rate cuts following robust economic growth in the US. While UK inflation had softened to 3.9% in November, representing its lowest rate in 26 months, December's reading showed an unanticipated uptick to 4.0%, which hurt both equity and bond prices.

The UK equity market, although positive during the period, lagged other developed regions on concerns about 'sticky' inflation and its lack of exposure to large technology firms, which performed strongly. Within the UK market, technology was the best-performing sector, although some of the more cyclical areas such as real estate, industrials and consumer discretionary delivered solid returns. Conversely, consumer staples, telecommunications and basic materials recorded negative performances.

The fund's equity portfolio outperformed the FTSE All Share Index as stock selection contributed positively. An above-market exposure to technology stocks was a key positive driver, followed by an underweight position in basic materials and an overweight allocation to industrials. An underweight position in consumer discretionary was the main detractor. An overweight holding in DCC was one of the largest contributors following acquisition plans. No weighting in Diageo was also positive for relative performance, as the global beverage company issued an unexpected profit warning. Conversely, having no exposure to RELX, which performed strongly, detracted. An overweight exposure to Close Brothers, a specialist lender, was negative given a review into motor finance lenders' historical commission agreements.

During the period, we selectively bought into high-quality companies at what we deemed to be attractive valuations, including Burberry, St James's Place, Renishaw, Inchcape and British Land. We tactically increased the equity weighting to take advantage of valuations among small and mid-cap companies. Towards the end of the period, we recycled proceeds from several names that had recovered well, such as Next.

The fund's fixed income allocation also generated positive returns, outpacing its benchmark – the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index. The main driver of outperformance came from security selection, while an above-benchmark exposure to interest rate risk (duration) also contributed. Sector allocation weighed on relative returns. An underweight exposure to housing associations and overweight position in banks were positive. However, this was more than offset by an underweight allocation to real estate and overweight exposure to utilities. Issuer selection within banks worked well, with Crédit Agricole, Swedbank, Lloyds Bank and UBS all adding value. Conversely, an exposure to debt issued by Motability Operations detracted on concerns that the lender may be impacted following the UK Financial Conduct Authority's investigation into potential misconduct across the sector. The fund's participation in a new International Distributions Services sterling bond issue was also negative.

The fund's activity was largely focused on participation in the primary market, where we took advantage of favoured names coming to the market at what we viewed as attractive valuations, including Nestlé, Manchester Airport and HSBC. We utilised our capacity to add off-benchmark exposure, participating in euro new deals where spreads looked attractive to us on a relative basis. Having managed down the fund's exposure to Thames Water Utilities Finance earlier in the period, due to concerns about its ability to service its debt, we participated in a new deal in January 2024. This made the issuer an overweight holding in the portfolio and reflected a lower supply overhang. Towards the end of the period, we lightened up on a number of utility names, including Italian energy provider Enel Finance International, ahead of expected supply in the first quarter of 2024. For similar reasons, we also reduced the fund's banking exposure.

Markets expect the Fed to start cutting interest rates in the summer, rather than the spring, and this has been reflected in bond yields, which have drifted back up a little in the period to date. The upward retracement has been more pronounced in gilt yields, as the Bank of England (BoE) has pushed back against imminent rate cuts. We still anticipate that economic growth will slow and inflation will continue to moderate due to the lagged impact of previous monetary tightening. This means the downtrend in bond yields is likely to resume. Hence, we are comfortable with the fund's moderate overweight duration positioning, while we are careful about credit risk given still tight spreads. On the equity side of the portfolio, we are mindful of earnings downgrade risk given the slowing economic backdrop. However, in the UK market, a recession has already largely been priced in within cyclical sectors and the broader market is inexpensive by historical standards and relative to most other equity markets. Thus, our approach is to be discriminatory on stock selection as we navigate 'choppier waters' in the near term, although we are conscious of great value, longer-term opportunities from this starting level of valuations.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Direct transaction costs incurred on securities transactions (including derivatives) are stated after deducting the proportion of the amounts collected from dilution adjustments that relate to direct transaction costs.

Performance values are at close of business on a bid basis, which will differ from those in the Performance summary.

Operating charges

Operating charges are expenses associated with the maintenance and administration of the fund on a day-to-day basis that are actually borne by the share class.

Share class launches and closures

There were no share classes launched or closed during the period.

Hedged share classes

Class A EUR (hedged) accumulation and Class I USD (hedged) accumulation are hedged share classes. Hedged share classes allow the ACD to use currency hedging transactions to reduce the effect of fluctuations in the rate of exchange between the currency of shares in those classes and sterling which is the base currency of the fund.

Ongoing charge figure

The annualised ongoing charge figure (OCF) of the fund is calculated as the ratio of the total ongoing charges to the average net asset value for twelve months. Ongoing charges are all expenses deducted from the assets of the fund during the period, except for expenses that are explicitly excluded by regulation.

	31/01/24 %	31/07/23 %
Class A accumulation	1.48	1.48
Class A income	1.48	1.48
Class C accumulation	0.57	0.57
Class E accumulation	0.98	0.98
Class E income	0.98	0.98
Class EM accumulation	0.98	0.98

Class M income	1.48	1.48
Class A EUR (hedged) accumulation	1.48	1.48
Class I USD (hedged) accumulation	0.73	0.73

The OCF is calculated in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

Risk and reward profile

The fund currently has 13 types of share class in issue: A accumulation, A income, C accumulation, E accumulation, E income, EM accumulation, EM income, I accumulation, I income, M accumulation, M income, A EUR (hedged) accumulation and I USD (hedged) accumulation.

Each share class has the same risk and reward profile which is as follows:

The share classes appear at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

The Synthetic Risk and Reward Indicator (SRRI) is calculated based on historical volatility over a rolling five* year period, it is reviewed monthly and updated if volatility has changed materially to cause a movement in the SRRI level. The SRRI is an indicator and may not accurately reflect future volatility and market conditions.

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share classes. Historic data may not be a reliable indication of the future risk profile of the fund. The rating is not guaranteed and may change over time.

Other material risks not captured by the rating:

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The fund could lose money if a counterparty with which the fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

Country or Region If a fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a fund which is more broadly diversified.

Currency Hedging When the fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the fund due to differences in short-term interest rates between the currencies.

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Derivatives The fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Investment Style - Equities In respect of the equities portfolio within the fund, this follows a value investment style that creates a bias towards certain types of companies. This may result in the fund significantly underperforming or outperforming the wider market.

Liquidity Securities within the fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

The full list of the fund's risks are contained in the 'Risk Factors' section of the fund's prospectus.

Risk and reward profile (continued)

There has been no change to the risk rating during the period.

The SRRI conforms to the ESMA guidelines for the calculation of the SRRI.

* Classes E accumulation, E income, EM accumulation and EM income launched on 24 June 2019. As these share classes do not have a five year history, a synthetic history has been created using the A accumulation, A income, M accumulation and M income share classes, respectively.
