

HORIZON SUSTAINABLE FUTURE TECHNOLOGIES

Enabling positive impact through innovation

Technology is the science of solving problems and its innovation is required for our world to meet the many challenges it faces. Investing in sustainable technologies provides investors with an avenue to drive positive change in not just environmental but also social issues. As the next generation of digital natives grow increasingly focused on sustainability, there are both significant and very broad investment opportunities within the sustainable technology sector.

Why this fund

Expertise managing the technology hype cycle

UK-based team of sector experts with over 90 years' combined industry experience navigating the hype cycle of technology

Positive impact technology themes

Additional fund information

Investment objective & policy

The Fund aims to provide capital growth over the long term (5 years or more) by investing in technology-related companies that contribute to the development of a sustainable global economy. The Fund invests at least 90% of its assets in shares (equities) or equity-related securities of technology-related companies, whose products and services are considered by the Investment Manager as contributing to positive environmental or social change, thereby having an impact on the development of a sustainable global economy. The Fund's investment universe is defined by technology-related companies that derive at least 50% of their current or future expected revenues from the sustainable technology themes identified by the Investment Manager (as further outlined in Investment Strategy section). The Fund will avoid investing in companies that the Investment Manager considers could contribute to significant environmental or societal harm. The Fund may also invest in other assets including investment grade government bonds, cash and money market instruments. The investment manager may use derivatives to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the MSCI ACWI Information Technology Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index. The investment manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to identify undervalued growth companies that are aligned with the UN's Sustainable Development Goals, and derive at least 50% of their current or future expected revenues from the sustainable technology themes the Investment Manager has identified as having a positive impact on those goals. The Investment Manager's identified themes include clean energy technology, sustainable transport, low carbon infrastructure, digital democratisation, health technology, smart cities, data security and resource and productivity optimisation. The Investment Manager looks to navigate the hype cycle (different stages in the development of a technology from conception to widespread adoption) around technology adoption by assessing the company's fundamental business model and by focusing on companies with high quality management following good governance practices and sustainable barriers to entry, driving longer term unappreciated earnings growth. The Fund will avoid investing in companies that the Investment Manager considers could contribute to environmental or societal harm.

Fund specific risks

Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified. The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events. The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities. nThe Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.
