Fees & charges (%)

Annual management charge (AMC)	0.50
Estimated ongoing charge (OCF)	0.78

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. Fund size at 12pm on last business day of month. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

The Consumer Price Index (CPI) is a measure of the change in prices of a basket of consumer goods and services. CPI is used in the UK as a measure of the change in inflation. It forms the basis of the Fund's performance target and provides a useful comparison against which the Fund's performance can be assessed over time.

Investment policy

The Fund invests globally in a diverse portfolio of investments which gain exposure indirectly to alternative asset classes such as private equity, infrastructure, property, commodities and hedge funds. The Fund will invest at least 80% in a combination of closed ended funds (e.g. investment trusts), investment companies, REITs, collective investment schemes (both regulated and unregulated and including those managed by Janus Henderson), exchange traded funds (ETFs), exchange traded notes (ETNs) and fixed interest securities. The Fund may also invest in cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the Consumer Price Index as this forms the basis of the Fund's performance target. The Investment Manager has complete discretion to choose investments for the Fund.

Investment strategy

The Investment Manager seeks to provide investors with a diversified portfolio of alternative assets such as hedge fund strategies, private equity and commodities, with the fund typically having a lower level of volatility when compared to movements in equity markets. The investment team seeks to identify attractive investments through assessing market conditions and conducting due diligence on alternative asset managers.

Fund specific risks

The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges. The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Glossary

Historic Yield

The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

Standard deviation

A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.
